

Aluminium, uPVC Doors & Windows Systems

*Transform Your Space with
Our Exquisite Doors & Windows*

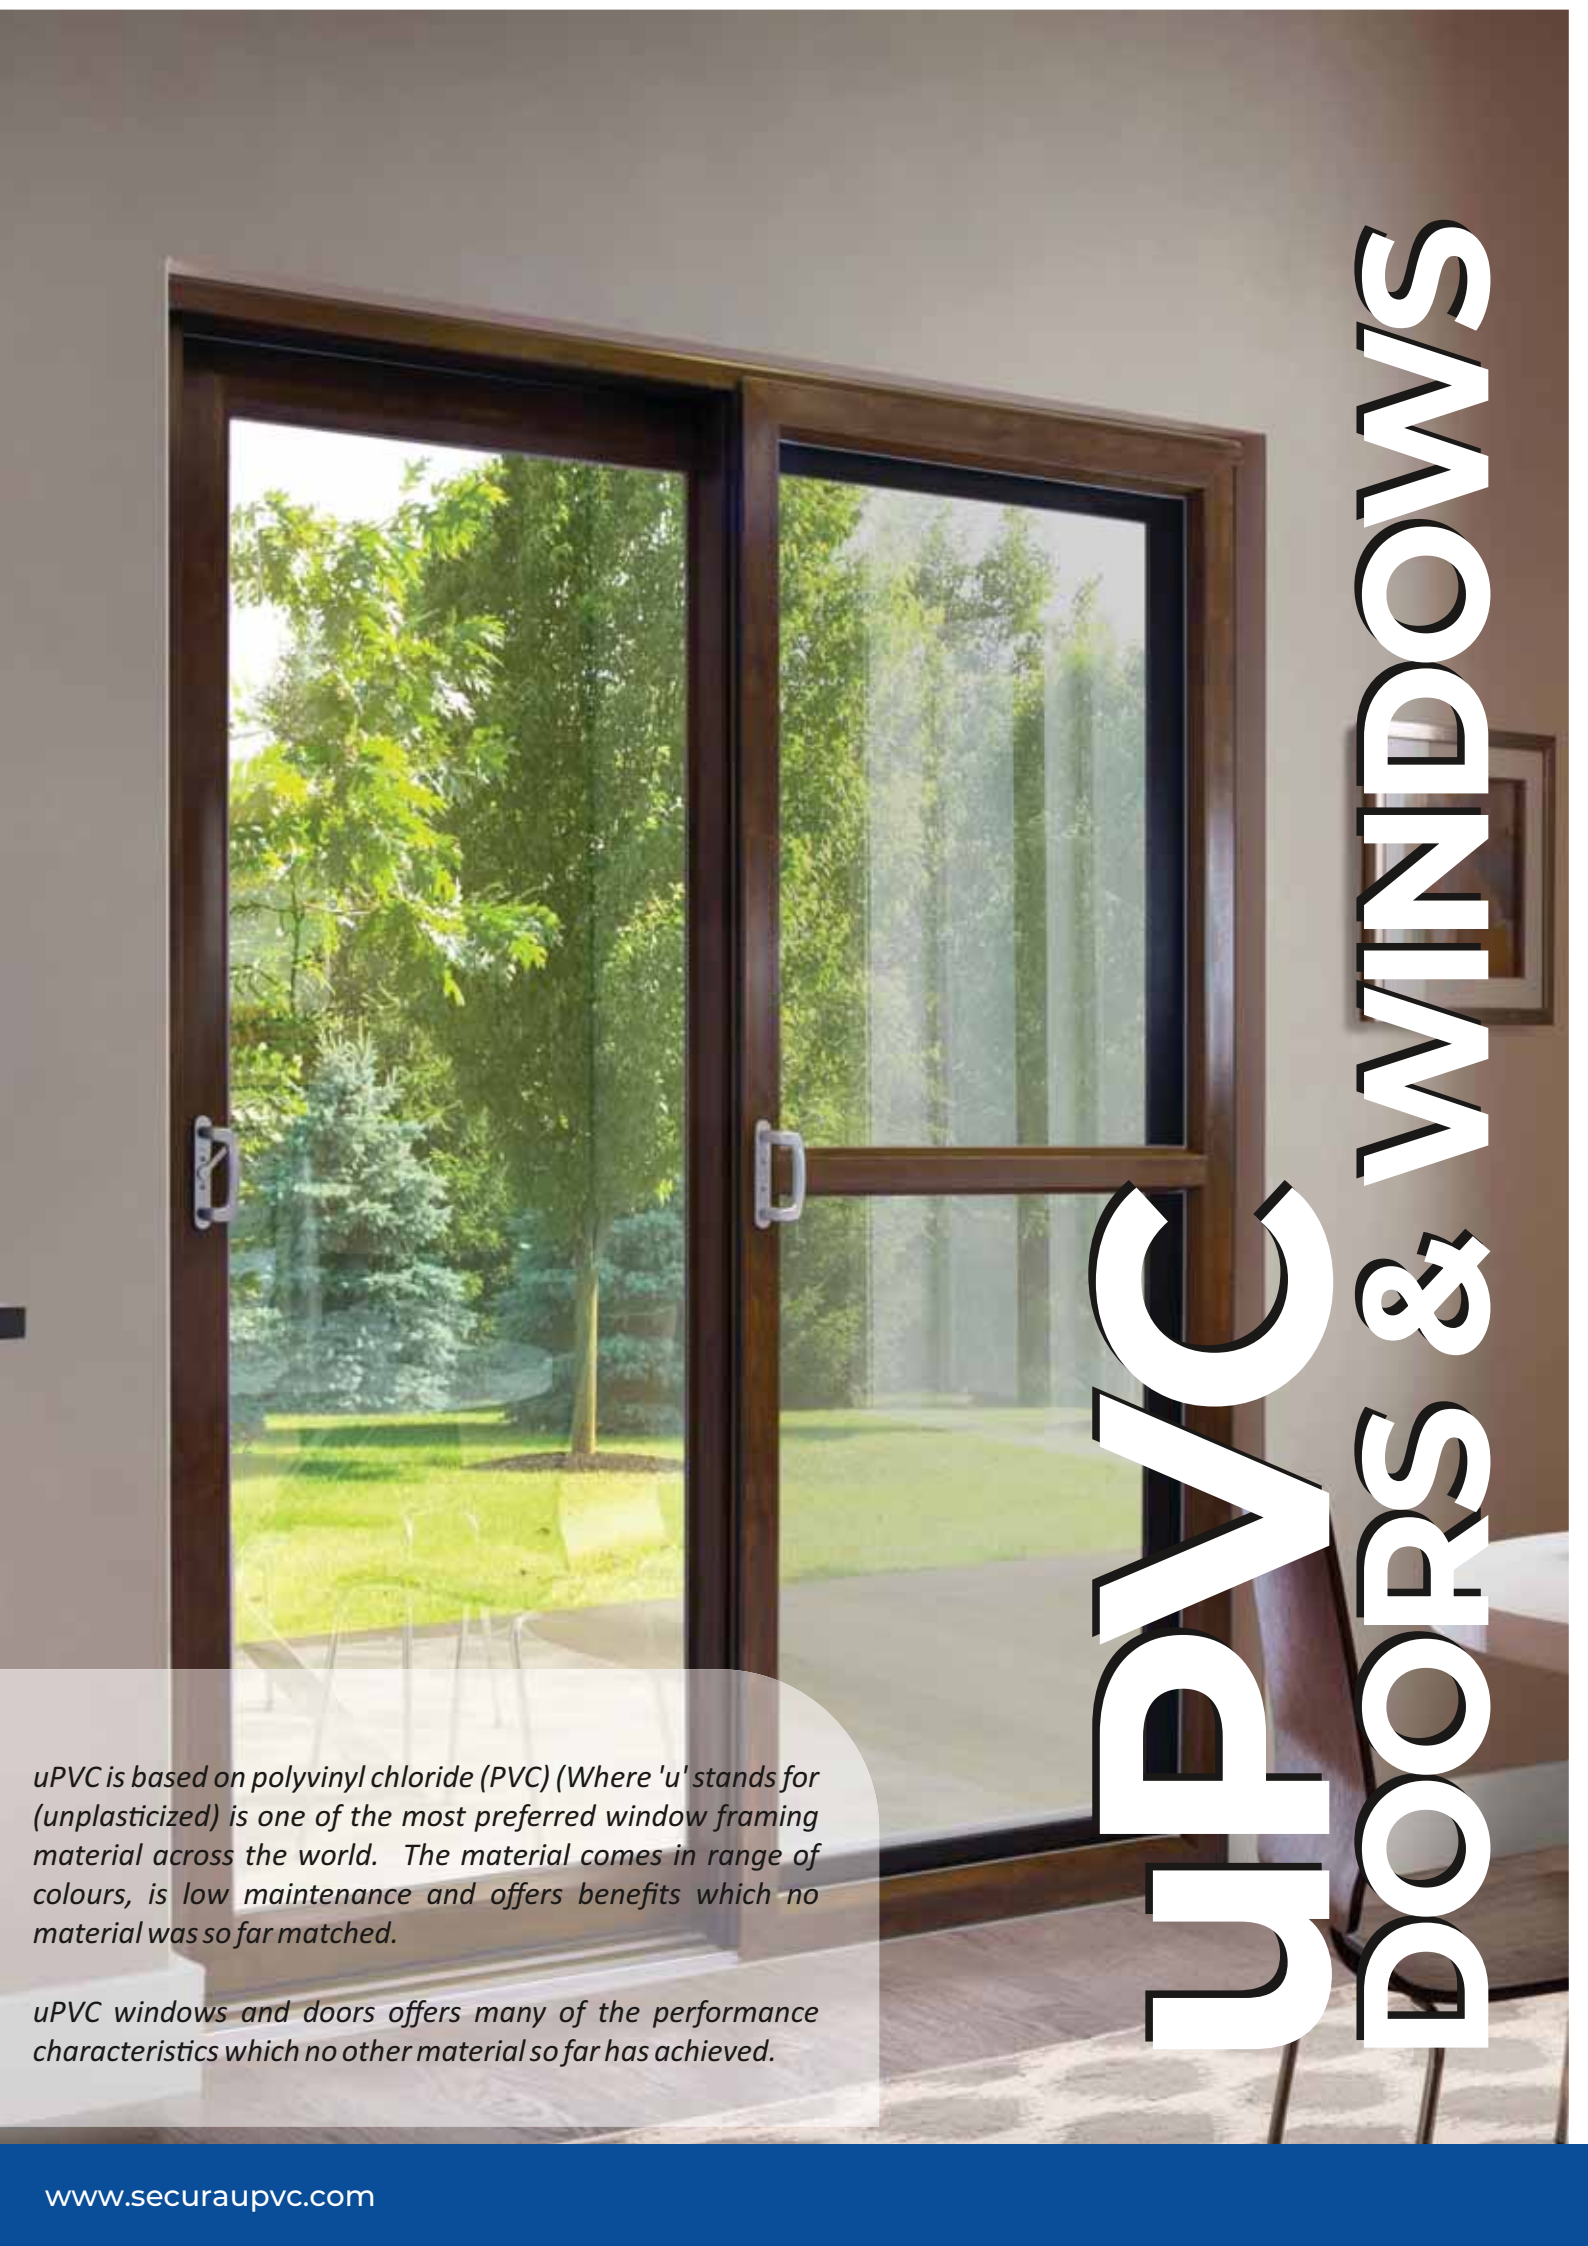

ABOUT US

Secura Windoors Pvt. Ltd. is the leading manufacturer of UPVC and Aluminium Door and Windows (under the brand of SECURA)

We supply on a PAN India level. We manufacture a range of other products such as Aluminium doors, Aluminium windows and Elevations and glass railings. Our manufacturing Unit is located in Noida, Uttar Pradesh, India.

We have set up a well-structured and robust infrastructural base that covers a wide area and helps us in designing a beautiful collection of home furnishing products with numerous specifications. Our infrastructural base is further divided into specialized divisions such as admin, sales, R&D, quality testing, procurement, designing, transportation, logistic, warehousing, and packaging.

Our team members manage all these divisions and help us attain the complete satisfaction of the clients and provide them with the best in class home furnishing products as per the industry set standards. Owing to our quick delivery and good logistic facility, we have been able to deliver these home furnishing products across the nation.

uPVC DOORS & WINDOWS

uPVC is based on polyvinyl chloride (PVC) (Where 'u' stands for (unplasticized) is one of the most preferred window framing material across the world. The material comes in range of colours, is low maintenance and offers benefits which no material was so far matched.

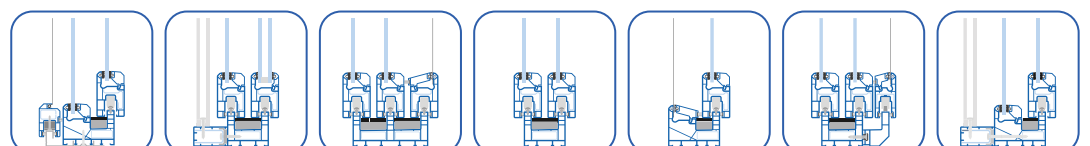

uPVC windows and doors offers many of the performance characteristics which no other material so far has achieved.

Secura Sliding Windows Series

The Sliding Window range is super flexible for people who make windows and people who buy them. It has lots of different options, like one sliding window or many sliding windows, and you can add on things like a fly screen. The sections come in different sizes, so you can use them for big or small windows. This makes it perfect for replacing old windows or building new ones in the fast-growing construction industry.

- One, two and three track sliding window and fly screen options
- Multi-chamber profile design frame depth from 62 to 112 mm
- 10 mm sash overlap for enhanced performance
- Internal glazing options from 4 mm single to 22 mm double
- There is a Choice of single or multi-point locking devices
- Secure hardware fitting into steel reinforcements as standard

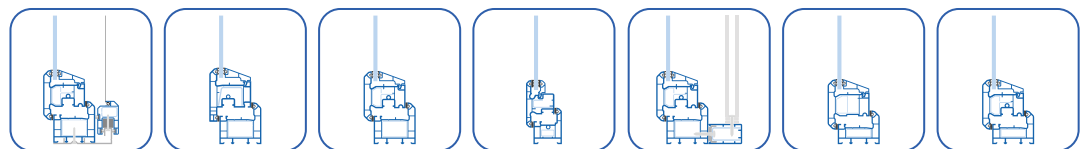

Secura Casement Windows Series

The Casement Window range is super flexible for people who make windows and people who buy them. It has two different sizes - 42 and 62 mm - so it can fit lots of different kinds of windows without needing too many different parts. This means that people who make windows can use the same parts for lots of different projects. And people who buy windows can choose from lots of different options that will work for their building. It's a great choice for anyone who needs new windows!

- Contemporary modern soft line profile appearance
- 10 mm sash overlap for enhanced performance
- Internal glazing options from 4 mm single to 36 mm triple
- Choice of single or multi-point locking devices
- Build-in hardware location facility for hinges striker etc
- Secure hardware fitting into steel reinforcements as standard

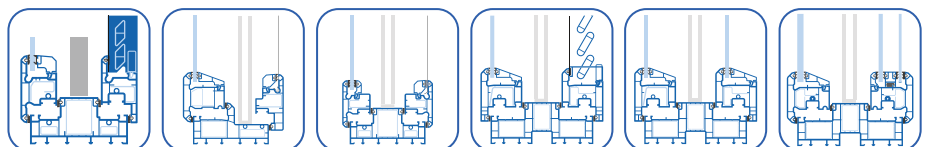

Secura Twinsash Windows Series

TwinSash Windows are super cool because they can do a lot of different things! They are made so that people who make windows and people who buy windows can both be happy. You can have a regular window that opens like a door, and also have a screen to keep bugs out. Plus, you can add a grill or blinds to make it even more secure and private. There's even a special kind of window that has little slats in it, and it still has a screen too! The people who make these windows can use fewer pieces to make them, which is good for them, and the people who buy them can choose from lots of different options.

- Contemporary modern soft line profile appearance
- Design compatibility with the EN casement and sliding range
- 10 mm sash overlap for enhanced performance
- Integrated solution for security grill and fly screens
- Choice of single or multi – point locking devices
- Secure hardware fitting into steel reinforcements as standard

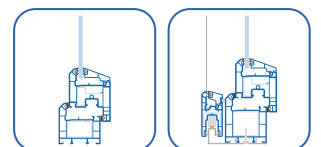

Secura Tilt & Turn Windows

The tilt & turn windows are one of the most versatile windows available in the market. These windows are multifunctional. They tilt open at the top for controlled ventilation (when required) and swing open like a door for greater ventilation. The tilting option prevents rain from entering but allows the room to remain well aired. Both these operations are controlled by the simple turn of a handle. Apart from this, they are available in uPVC, wood, and aluminium frames to enhance durability and aesthetic features. Install them in spaces that require additional ventilation and comfort.

- Contemporary modern soft line profile appearance.
- 10 mm sash overlap for enhanced performance
- Internal glazing options from 4 mm single to 36 mm triple
- Concealed heavy duty hinges to enable continuous weather seals
- External sliding fly screen system
- Secure hardware fitting into steel reinforcements as standard

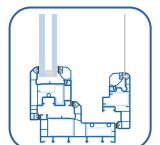

Secura Parallel Windows

These windows are also really strong, and can hold up to 200kg (that's like two big adults!) per window. You can choose from lots of different types of glass to put in the windows, so you can make them look however you want.

If you want to make sure nobody can get in or see inside, you can even add a security grill or blinds. That way, you can feel safe and private in your space.

- Can be inward or outward opening.
- Glazing options from 4 mm single to 36mm triple.
- Internal sash options with fly screen or glazed as above
- Integrated solution for security grill
- 3 frame options to choose from
- Multi point locking devices

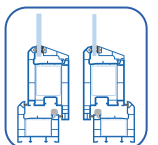

Secura Invisi Fold Doors

Have you ever heard of the Invisi Fold Door? It's a really cool way to turn regular windows and doors into sliding, folding, or swinging ones! This is a great option if you want something different than the usual fold and slide or bi-fold windows and doors.

One of the best things about the Invisi Fold System is that the sliding panels are loaded from the bottom, so they won't drop like other systems might. This means you won't have any trouble with installation or maintenance. So if you're looking for a unique and easy way to upgrade your windows and doors, the Invisi Fold System might be just what you need!

- Can be opening in or out
- 2. 3. 4. 5. 6 and 7 pane option
- Internal glazing option from 4mm single to 36mm triple glazing
- Frame width of up to 18'8" can be achieved with a maximum height of 9' in Single Glass unit & 7' in Double Glass unit without exceeding a sash weight of 80 kgs.

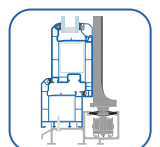

Secura Fold & Slide Door

The Fold N Slide Doors system provides superior operating performance and smooth integration into any architectural style and space. The door system is engineered using high quality uPVC Window. Door profiles, superior hinge and locking systems that are reliable and secure. The rollers along which the doors slide offer a smooth glide and reliable performance with solid design and expert engineering.

- Contemporary modern Softline appearance
- 10 mm sash overlap for enhanced performance
- Internal glazing option from 4 mm single to 36 mm double
- Multi-point perimeter locking devices as standard
- Heavy duty tandem rollers for smooth operation
- Secure hardware fitting into steel reinforcements as standard

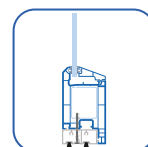

Secura Casement Doors

Secura offers doors that can open in or out and come in single or double casement styles. These doors can be used as the main entrance or as a door leading to a balcony or patio. They come in two different profile depths, 62mm or 112mm, and can be made as a standalone door or as part of a larger screen with fan lights or side lights. Double doors, also known as French doors, are a great option if you want a wide opening without a sliding door.

- Contemporary modern soft line appearance.
- 10 mm sash overlap for enhanced performance.
- Internal glazing options from 4 mm single to 36 mm double.
- Choice of numerous multi-point locking devices including full perimeter locking
- Threshold-less or Aluminum low threshold
- Choice of hinge types including concealed (invisible) hinges

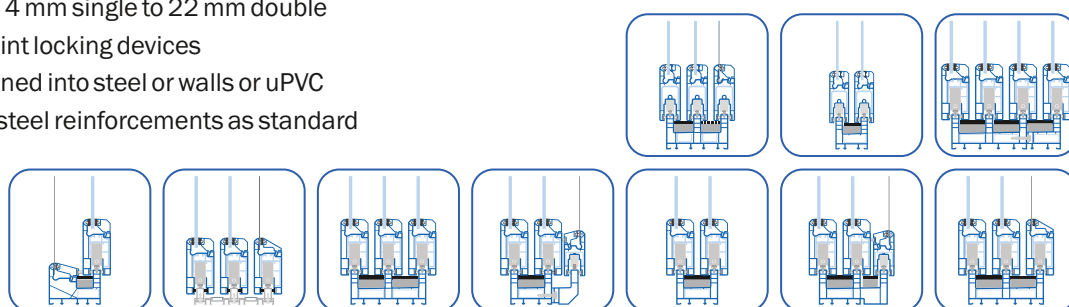

Secura Sliding Doors

Secura Sliding Doors range covering frame depths from 62mm to 142mm and is designed to provide the maximum flexibility for fabricators and clients alike. Based on a range of sections it offers full flexibility from single sliding to multiple sliding openers clip on or integrated sections for fly screen and a range of section sizes covering small and large openings.

- 1, 2, 3 and 4 track sliding. Patio door and fly screen options
- 10 mm sash overlap for enhanced performance
- Internal glazing options from 4 mm single to 22 mm double
- Choice of single or multi – point locking devices
- Hardware components fastened into steel or walls or uPVC
- Secure hardware fitting into steel reinforcements as standard

ALUMINIUM DOORS & WINDOWS

Aluminium doors and windows are a popular choice for both residential and commercial properties due to their durability, low maintenance, and excellent insulation. They are resistant to weathering, corrosion, and rust, making them ideal for harsh environmental conditions. Additionally, they offer versatility in design and are cost-effective.

Secura Casement Windows

Secura Aluminium is a type of window made of aluminum that opens like a door. It's a great choice for people who want a good quality window that won't cost too much money. These windows are really good at keeping heat inside your house and blocking out noise from outside. They're also really strong and can withstand bad weather. Osiris Aluminium windows are perfect for homes and buildings that need to be really sealed up tight. The way they're designed and the materials they're made of make them really good at keeping your house comfortable and safe.

- Open IN & Open out.
- Contemporary & Stylish.
- Minimum maintenance.
- Wide range of profiles, shapes and finishing's for every type of solution.
- Concealed hinges.

Secura Pivot Window

An aluminium pivot window rotates on a pivot from the centre of the window. This rotation can be either horizontal or vertical, depending on your preference. The pivot window is a solution which allows maximum levels of ventilation due to the range of opening from 0° to 180°. To support energy efficiency our pivot windows include a thermal break. This thermal break is a barrier which stops cold air or heat transferring from the outside to the inside and visa versa. All of our aluminium window solutions are either powder coated or anodised to give them a durable and very long lasting finish.

- Open vertically sashes, turning through-180°
- Open horizontally sashes, turning through-180°
- Friction controlled opening upto-30°
- Unlock button allows window to open up-to 180° for cleaning.
- Compatible with perimeter closings to improve seal against weather agents.

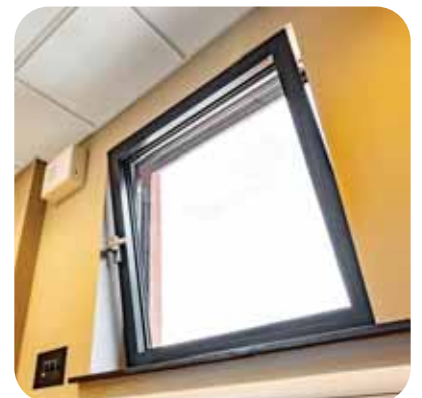

Secura Tilt & Turn Window

An aluminium tilt & turn window has two operations. It can tilt to open inwards like a bottom hung window or turn to open inwards like a side hung window. This window solution allows you to have different levels of ventilation into your spaces, the tilt option allows lower levels of airflow due to its restricted opening. Whilst the turn operation can open up to and beyond a 90 degree angle to allow maximum airflow through the opening. To support energy efficiency our fixed windows include a thermal break. This thermal break is a barrier which stops cold air or heat transferring from the outside to the inside and visa versa. All of our aluminium window solutions are either powder coated or anodised to give them a durable and very long lasting finish.

- Open IN.
- Contemporary & Stylish.
- Tilt position allows draft free ventilations.
- Turn position offers maximum ventilation, egress opening and quick cleaning.
- Concealed hinges.

Secura Perfection Slide Door

Secura Perfection Slide is the new sliding system with an essential and slender design that completes the Perfection range. The minimal aesthetics (central node of only 20 mm) are accompanied by innovative technical solutions.

The system comes with thermal break & Non thermal break solution and has been designed to maximum ease of construction and assembly. The reduced area of the profiles, the greater glazed surface, the possibility of installing double-glazing and the development of higher quality insulating materials, enable the Osiris Perfection Slide system to obtain extremely high performance in terms of final thermal transmittance (U_w) and light transmission.

The continuous research in the design of the components has led to an important innovation with regards to the adjustable handling carriages, with parallel wheels, which can now support loads up to 500 Kg. for each shutter.

- Elegant and minimal design obtained by reducing the visible profile to the minimum possible.
- Possibility of creating a large windows with very heavy doors
- Maximum ease of construction and assembly
- Possibility of completely embedding the frames and doors in the wall and door.
- High resistance, minimum maintenance

Secura Fold & Slide Door

Secura Fold & Slide Door enable the construction of verandas with bi-fold and concertina doors with lateral folding mechanism. The most striking aspect of this series is the possibility of complete open large walls, ensuring maximum brightness in the living space and providing the pleasant feeling of no longer having barriers between indoors and outdoors. The convenient folding opening system of the Osiris solves the problem of having space taken up by the open doors, a typical problem of large casement windows. This solution offers a smooth glide and reliable performance with solid design and expert engineering.

- Open IN & Open OUT.
- 2, 3, 4, 5 & 6 Panel options
- High security hinges, locking mechanisms and high strength roller design.
- Max weight: Up to 150 kg per sash
- Chamfered and square bead options.

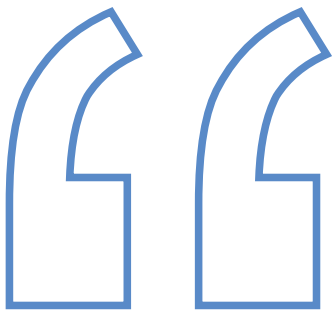

Secura French Door

The Secura Aluminium system uses larger insulation bars enabling superior thermal performance with the increased glazed surface while maintaining the same minimal aesthetics. As in the previous system, the Osiris Aluminium high-performance windows have slender, essential lines for contemporary aesthetics that aim at maximum luminosity while minimizing the visible surface of the profile. The result is a larger glazed area, high thermal and acoustic insulation that ensures unparalleled living comfort. The style of this refined, minimal design does not compromise the functionality and combines a sophisticated quality of insulating materials with the perfect functioning of the hidden accessories integrated within the profile itself. These factors enable the creation of heavy sash panels with maximum security against burglary

- Minimal design built by using the visible profile (70 mm) and concealed accessories.
- Larger glazed surface and reduced profile area enable lower thermal transmittance (UW).
- Best quality materials with superior performance.
- Maximum resistance and luminosity.
- Very minimal maintenance is required.
- A wide range of colours and finishes to meet every building's aesthetic needs.
